

Shackles and Thimbles

Figure 1 Thimble and shackles

Figure 2 guy anchor with forged saddle end

This anchor is 66" long with a six-inch helix. It will handle 15,000+ pounds in clay.

Figure 3 thimble and forged shackle

Thimble reduces the stress on grip or cable by making radius smooth and large.

Figure 4 3/8th heavy thimble

Thimbles should be suitable wall and radius for the job or even oversized.

Figure 5 anchor setup

Inner Anchor on 200ft tower, bottom two guy lines

Figure 6 Anchor and forged shackles
